## Comments

**(TQ) What specific things about the course could be improved to better support student learning?**

- non mandatory quizzes
- clearer outline of what is expected of us on the exams.
- I do not think there is much this course provided me with all the material I needed to be successful.
- Honestly don't have any suggestions
- nothing
- n/a
- NA
- I honestly loved the way the course was set up, if I had to cherry pick and pick one thing that I would want changed it would simply be to have more time for the students to ask questions.
- More detailed review sessions outside of class.
- More real world connections to help show the importance of the course.
- Homework and better slides that isn't just a blurb of information, even though professor sierra was professional and engaging.
- The homeworks were very long, the length would be the only improvement to the course.
- N/A
- n/A
- There isn't much, this class was taught very well
- NONE
- Nothing in my opinion
- I think maybe more assignments could be beneficial but not necessary.
- more multiple choice questions on exams
- Better room. It was disgustingly hot in that class which made it difficult to learn!
- N/a.
- Not much.
- maybe more engagement
- N/a
- N/A
- Just a tad less fast paced if possible. It sometimes felt like we were learning 10 new topics a day
- Nothing. Very enjoyable.
- the homework difficulty
- More practice, I believe there was so much to take notes off which kind of through off half way
- Nothing
- More practice problems, there are a lot for the material at the start of the course but less for theory of the firm and so on
- Nothing.
- Wished lectures were recorded, Sierra gave reasons why they shouldn't be (like student attendance), but having an extra way to review the material would be greatly appreciated.
- I don't have much to say, I think Smith was awesome and I love the econ help center. I think just how big the class was made it hard to ask questions and focus.
- Slower explanations there was so much information and she went through everything so fast without a chance for questions
- lectures more engaging/descriptive, not just "here's the work and the answers".
- The notes could be easier to understand.
- Some of the questions on the problem sets were very long and there was quick turnaround time between when a problem set finished and when the next one was due

**(TQ) What specific things about the course helped support your learning?**

- I appreciated the practice questions that were uploaded to D2L and the prompt response fro grading.
- The homework packets each week I think really helped me to understand the course material. I also found the in-class quizzes each Tuesday to be really helpful. She also posts test reviews and practices as well as a lot of extra worksheet practices. I also relied a lot on the econ help center. Smith was very organized and helpful.
- in class quizzes problem sets
- lectures, problem sets.
- The professor explained things very good and the problems sets and quizzes helped me prepare for the exams
- Showing up.
- The problem sets/quizzes being a completion grade really took a lot of stress off my shoulders for a harder class. It allowed me to attempt the hws without the stress of getting everything right and rather helped me actually learn what I was doing
- the quizzes where really useful making me keep track of what I had to learn
- Good lectures, homework problem sets are well written to be learn as you go
- the problem sets were very helpful
- good problem sets and practice problems
- NONE
- Practice exams
- Her attention to detail and great explanations made this class enjoyable and easy to follow alon.
- The lecture slides are extremely well detailed, and it is easy to follow along in the practice problems and understand what happened.
- the problem sets
- problem sets
- Sierra Smith is a fantastic instructor. I cannot sing her praises enough. Class materials are of the highest quality. If she is teaching 401, then I am absolutely switching into that class. The quality of instruction provided by the Graduate Assistant, Sierra Smith, is greater than excellent.

- I appreciated the consistency we had in workload. We would do 2 problem sets in for each exam, we would take quizzes every Tuesday. I liked knowing what to expect for every class and not scrambling to remember what things are due when. Also, Sierra Smith was an excellent instructor and I learned a lot from this class!
- Practice Sets
- Extra practice questions
- The lectures and going over homework or quizzes was very helpful grasping the material and process of getting answers.
- Great explanations of the topics
- The exam reviews and review sessions.
- us being graded on completion instead of correctness made me actually try my best and not try to cheat or anything and she was always super supportive and helpful throughout the entire semester.
- I thought the tests were always incredibly fair/well balanced, never felt "cheated" on an exam, and over all a very well structured/curricularized (is that a word?) course.
- Her teaching style and structure
- The problem sets and quizzes were very helpful in preparing me for exams.
- The quizzes we would have on every Tuesday. They went over what we had learned the week prior and afterwards we would go over the answers to make sure we were all on the same page.
- The assignments allowed me to apply what I learned in lecture. Ms. Smith did a wonderful job in lecture explaining and answering questions when needed.
- Sierra taught the material very well
- I appreciate the large amount of practice problems that are available to help re-enforce content learned in class
- The problem sets were great practice for the exams
- The problem sets
- Prequizes and example problems
- The professor was great and made sure everything was understandable and comprehensible.
- the lectures were good
- weekly quiz to strengthen the memory of knowledge
- Problem sets and weekly quizzes in class.
- The lectures and the practice exams.
